

### Amendments to the Claims

This listing of claims will replace all prior versions and listings of claims in the application.

### Listing of Claims

1. (currently amended) A communication system comprising:  
~~one or more computer readable mediums~~ a first communication device,  
comprising:  
determining means operable to determine an attribute of a ~~first~~ second  
communication device and to determine an attribute of ~~[[a]]~~ the second communication  
device;  
identifying means operable to identify a first avatar by using the attribute of the  
~~first~~ second communication device, wherein the first avatar is such that it conveys to a  
viewer thereof information about a person; and  
identifying means operable to identify a second avatar, different from the first  
avatar, by using ~~[[the]]~~ an attribute of ~~the second~~ a third communication device, wherein  
the second avatar is such that it conveys to a viewer information thereof about the person;  
communicating means operable to communicate the first avatar to the ~~first~~ second  
communication device and the second avatar to the ~~second~~ third communication device,  
wherein communicating the first avatar comprises displaying a visual representation of  
the ~~first~~ second avatar on the first communication device and communicating the second  
avatar comprises displaying a visual representation of the ~~second~~ third avatar on the  
second communication device.
2. (previously presented) The communication system as claimed in  
claim 1, further comprising replacing means operable to replace the first avatar with  
another avatar.
3. (previously presented) The communication system as claimed in  
claim 2, wherein the identifying means is operable to identify the first avatar by

comparing the attribute to a communication device identifier that is associated with the first avatar.

4. (original) The communication system as claimed in claim 3, further comprising recording means arranged to allow the person to record the communication device identifier.

5. (original) The communication system as claimed in claim 4, wherein the replacing means is further operable to replace the communication device identifier with another communication device identifier.

6. (currently amended) The communication system as claimed in claim 5, further comprising selecting means operable to allow the person to select the first avatar from a plurality of other avatars associated with the person.

7. (original) The communication system as claimed in claim 6, wherein the selecting means is further operable to allow the communication device identifier to be selected from a plurality of other communication device identifiers.

8. (previously presented) The communication system as claimed in claim 7, wherein the determining means is operable to determine the attribute by processing caller identification data associated with the communication device.

9. (previously presented) The communication system as claimed in claim 8, further comprising messaging means operable to create a text, an audio and/or a video message that is associated with the first avatar.

10. (previously presented) The communication system as claimed in claim 9, wherein the first avatar and the plurality of other avatars depict an activity that involves the person.

11. (previously presented) The communication system as claimed in claim 10, wherein the communication device comprises a mobile telephone and the attribute comprises a telephone number of the mobile telephone.

12. (currently amended) A communication system comprising:  
~~one or more computer readable mediums, comprising:~~  
an environment support means operable to support at least one virtual environment that can be accessed by a first person; and  
a communicating means operable to communicate an avatar in the virtual environment to a mobile telephone handset of the first person subsequent to the first person accessing the environment, the avatar being such that it can convey to the first person information about a second person, whereby a visual representation of the avatar in the virtual environment is sent to the mobile telephone handset.

13. (previously presented) The communication system as claimed in claim 12, which the environment support means is operable to determine a level of authority associated with the second person, and provide the second person with access to the virtual environment if the level of authority is deemed appropriate, where access to the virtual environment comprises conveying a visual representation of the virtual environment.

14. (previously presented) The communication system as claimed in claim 13, wherein the environment support means is operable to allow the first person to assign the level of authority.

15. (previously presented) The communication system as claimed in claim 14, wherein the environment support means is such that it allows the first person to arrange the virtual environment such that it has a desired appearance.

16. (previously presented) The communication system as claimed in claim 15, wherein the environment support means is operable to allow the first person

and the second person to exchange other information via the virtual environment.

17. (previously presented) The communication system as claimed in claim 16, wherein the other information comprises multi-media content.

18. (previously presented) The communication system as claimed in claim 17, wherein the communicating means is further operable to allow the second person to control whether the avatar conveys the information to the first person.

19. (previously presented) The communication system as claimed in claim 18, wherein the environment support means is operable to allow the first person to access the virtual environment via a communication network, the communicating means also being operable to communicate the avatar in the virtual environment to the first person via the communication network.

20. (previously presented) The communication system as claimed in claim 19, wherein the information conveyed by the avatar to the first person comprises audio and/or video information.

21. (currently amended) A communication method for communication between devices comprising the steps of:

- ~~determining~~ receiving at a user's device an attribute of a first communication device;
- identifying a first avatar by using the attribute of ~~[[the]]~~ a first communication device, wherein the first avatar is such that it conveys to a viewer thereof information about a person;
- communicating the first avatar in a virtual environment to the first communication device;
- ~~determining~~ receiving at a user's device an attribute of a second communication device;
- identifying a second avatar by using the attribute of the second communication

device, wherein the second avatar is such that it conveys to a viewer thereof information about the person, and wherein the second avatar is different from the first avatar; and communicating the second avatar in a virtual environment to the second communication device.

22. (previously presented) The method as claimed in claim 21, further comprising the step of replacing the first avatar with another avatar, wherein both avatars are associated with the person.

23. (previously presented) The method as claimed in claim 22, wherein the step of identifying the first avatar comprises identifying the first avatar by comparing the attribute of the first communication device to a communication device identifier that is associated with the first avatar.

24. (previously presented) The method as claimed in claim 23, further comprising the step of recording the communication device identifier.

25. (previously presented) The method as claimed in claim 24, further comprising the step of replacing the communication device identifier with another communication device identifier.

26. (previously presented) The method as claimed in claim 25, further comprising the step of selecting the first avatar from a plurality of other avatars.

27. (previously presented) The method as claimed in claim 26, further comprising the step of selecting the communication device identifier from a plurality of other communication device identifiers.

28. (previously presented) The method as claimed in claim 27, wherein the step of determining the attribute comprises determining the attribute by processing caller identification data that is associated with the communication device.

29. (previously presented) The method as claimed in claim 28, further comprising the step of creating a text, an audio and/or a video message that is associated with the avatar.

30. (previously presented) The method as claimed in claim 29, wherein the first avatar and the plurality of other avatars depict an activity that involves the person.

31. (previously presented) The method as claimed in claim 30, wherein the communication device is a mobile telephone and the attribute is a telephone number of the mobile telephone.

32. (currently amended) A communication method comprising the steps of:

supporting at least one virtual environment that can be accessed by a ~~first person~~ plurality of first persons; and

communicating ~~[[an] a selected~~ avatar in the virtual environment to ~~the first person~~ each one of the plurality of first persons subsequent to ~~the first person~~ each of the first persons accessing the environment by a mobile telephone handset, ~~[[the]]~~ each selected avatar being such that it can convey to ~~the first person~~ each one of the persons information about an activity that a second person is engaged in, the communication of ~~[[the]]~~ each selected avatar comprising conveying a selected visual representation of the avatar in the virtual environment to a visual display of the mobile telephone handset.

33. (previously presented) The method as claimed in claim 32, further comprising the step of determining a level of authority associated with the second person, and providing the second person with access to the virtual environment if the level of authority is deemed appropriate.

34. (currently amended) The method as claimed in claim 33, further

comprising the step of ~~the first person~~ each one of the first persons assigning the level of authority.

35. (previously presented) The method as claimed in claim 34, wherein the step of supporting the virtual environment comprises the step of arranging the virtual environment such that it has a desired appearance.

36. (currently amended) The method as claimed in claim 35, further comprising the step of exchanging other information between ~~the first person~~ each one of the first persons and the second person via the virtual environment.

37. (previously presented) The method as claimed in claim 36, wherein the other information comprises multi-media content.

38. (previously presented) The method as claimed in claim 37, wherein the step of communicating the avatar to the first person comprises the step of controlling whether the avatar conveys the information to the first person.

39. (currently amended) The method as claimed in claim 38, further comprising the step of allowing ~~the first person~~ each one of the first persons to access the virtual environment via a communication network, and the step of communicating the avatar in the virtual environment to the first person via the communication network.

40. (currently amended) The method as claimed in claim 39, wherein the information conveyed by the avatar to ~~the first person~~ each one of the first persons comprises audio and/or video information.

41-42. (cancelled)
